

# Goodbye drafts, hello comfort

Warm up with our free Home Winterproofing Program

**“I’ve noticed my bills are completely different from last year, up to 40% lower. The comfort level in my house is definitely more consistent.”**

– Mike H., Niagara Falls

# Warm up to energy savings. Enbridge Gas can help.

Some homes, especially older ones, can feel drafty and uncomfortable when the weather turns cold.

**Wake up to a well-insulated home that feels warm and snug all the time.**

Apply for the Home Winterproofing Program and prepare to say farewell to cold and drafty winters in your home.

**And the best part — winterproofing upgrades are FREE to homes that qualify.**

**This program includes:**

- **New insulation.**
- **Draft proofing.**
- **Smart thermostat.**

**Right now:** We are offering a **FREE Smart Thermostat** for qualified participants!

Choose from either the NEST E or ecobee3 Lite.

**To qualify,** you must be an Enbridge Gas customer responsible for your own gas bill, heat your home with natural gas, and meet the criteria listed at [winterproofing.ca](http://winterproofing.ca) for household income or government assistance program.

**Enjoy a more comfortable home, plus savings on your energy bills. Visit [winterproofing.ca](http://winterproofing.ca) for more information and to apply.**

## Improved comfort

Through the Home Winterproofing Program, Enbridge Gas helps eligible customers afford home improvements that will increase their comfort. We pay for new insulation and draft proofing installed by experienced professionals.

## Healthier living

Living in drafty conditions can be hard on your health. Fewer drafts mean a more comfortable home for you and your family.

## Lower energy bills

As well as making your home warm and comfortable, winterproofing can reduce energy use by up to 30 per cent.
